

JOB DESCRIPTION

Backend / Full Stack Developer

Planet NEXTgen Technologies (P) Ltd. | Mumbai · UAE · Singapore

ABOUT PLANET NEXTGEN TECHNOLOGIES

Planet NEXTgen Technologies (PNT) is part of the globally trusted Planet Ventures group, with a strong footprint in India, the UAE, and Singapore. We are a fast-moving, product-first startup on a mission to solve real-world business problems through intelligent automation, AI-powered workflows, and autonomous agents — helping enterprises move faster, operate smarter, and scale with confidence.

Our flagship platforms — UnitXPro (quality & compliance), PulseXPro (facility & food services), and My OCS Journey (offshore workforce operations) — are used by leading enterprises across Healthcare, FMCG, Food & Beverage, Pharmaceuticals, Supply Chain, and Energy sectors globally.

If you are excited by the idea of building products that actually change how industries operate — using the latest in AI, automation pipelines, and intelligent agents — you will find your people here.

POSITION OVERVIEW

Job Title	Backend / Full Stack Developer
Department	Product Development
Location	Mumbai, Maharashtra (HQ) / Remote (as applicable)
Reporting To	Team Lead
Employment Type	Full-Time, Permanent
Experience	1 – 2 Years
Notice Period	Immediate to 30 Days Preferred

ROLE SUMMARY

We are looking for a motivated and skilled Backend / Full Stack Developer with 1–2 years of experience in designing, developing, and maintaining web applications. The ideal candidate should have working knowledge of ASP.NET and ASP.NET Core with C#, hands-on experience with Angular for building responsive interfaces, and familiarity with SQL Server or PostgreSQL for database operations.

KEY RESPONSIBILITIES

- ▶ Develop and maintain web applications using ASP.NET and ASP.NET Core with C#.
- ▶ Build and consume RESTful APIs and web services.
- ▶ Create responsive UI components using Angular, HTML5, CSS3, and TypeScript.
- ▶ Write and execute basic database queries, stored procedures, and views in SQL Server / PostgreSQL.
- ▶ Collaborate with senior developers and cross-functional teams to deliver assigned tasks.
- ▶ Perform debugging and basic troubleshooting of application issues.
- ▶ Follow coding standards, best practices, and participate in code reviews.
- ▶ Use Git for source code management and version control.
- ▶ Assist in application deployment and maintenance activities.
- ▶ Prepare basic technical documentation as required.

REQUIRED QUALIFICATIONS & EXPERIENCE

- ▶ Bachelor's degree in Computer Science, IT, Engineering, or related field.
- ▶ 1–2 years of professional software development experience.
- ▶ Working knowledge of ASP.NET and ASP.NET Core with C#.
- ▶ Hands-on experience with Angular, HTML5, CSS3, and TypeScript.
- ▶ Familiarity with SQL Server or PostgreSQL — basic queries, stored procedures, and views.
- ▶ Understanding of RESTful API concepts and Entity Framework Core.
- ▶ Basic knowledge of Git for source control.
- ▶ Awareness of authentication concepts (JWT, OAuth).
- ▶ Exposure to Agile/Scrum methodologies.
- ▶ Strong problem-solving, analytical, and communication skills.

PREFERRED SKILLS (NICE TO HAVE)

- ▶ Basic knowledge of Docker / containerization.
- ▶ Awareness of CI/CD concepts.
- ▶ Exposure to unit testing frameworks.

WHAT WE OFFER

- ◆ Competitive CTC (market-aligned)
- ◆ Health & Wellness benefits
- ◆ Flexible / hybrid work options
- ◆ International exposure (India · UAE · Singapore)

- ◆ Fast-growth startup culture with ownership mindset
- ◆ Learning, certifications & conference budget
- ◆ Work directly on enterprise-grade SaaS products
- ◆ Collaborative, inclusive & innovation-first team

HOW TO APPLY

Interested candidates are invited to send their updated resume along with a brief cover note to:
