

## JOB DESCRIPTION

# Backend / Full Stack Developer

Planet NEXTgen Technologies (P) Ltd. | Mumbai · UAE · Singapore

## ABOUT PLANET NEXTGEN TECHNOLOGIES

Planet NEXTgen Technologies (PNT) is part of the globally trusted Planet Ventures group, with a strong footprint in India, the UAE, and Singapore. We are a fast-moving, product-first startup on a mission to solve real-world business problems through intelligent automation, AI-powered workflows, and autonomous agents — helping enterprises move faster, operate smarter, and scale with confidence.

Our flagship platforms — UnitXPro (quality & compliance), PulseXPro (facility & food services), and My OCS Journey (offshore workforce operations) — are used by leading enterprises across Healthcare, FMCG, Food & Beverage, Pharmaceuticals, Supply Chain, and Energy sectors globally.

If you are excited by the idea of building products that actually change how industries operate — using the latest in AI, automation pipelines, and intelligent agents — you will find your people here.

## POSITION OVERVIEW

<b>Job Title</b>	Backend / Full Stack Developer
<b>Department</b>	Product Development
<b>Location</b>	Mumbai, Maharashtra (HQ) / Remote (as applicable)
<b>Reporting To</b>	Team Lead
<b>Employment Type</b>	Full-Time, Permanent
<b>Experience</b>	3 – 4 Years
<b>Notice Period</b>	Immediate to 30 Days Preferred

## ROLE SUMMARY

We are seeking an experienced Backend / Full Stack Developer with 3–4 years of hands-on experience in designing, developing, and delivering scalable web applications. The ideal candidate should have strong proficiency in ASP.NET and ASP.NET Core with C#, solid expertise in Angular for building enterprise-grade front-end applications, and deep knowledge of SQL Server and PostgreSQL. A strong command of Angular — including component architecture, state management, and performance optimization — is essential for this role.

## KEY RESPONSIBILITIES

- ▶ Design and develop scalable, high-performance web applications using ASP.NET and ASP.NET Core with C#.
- ▶ Design and implement robust RESTful APIs and integrate third-party web services.
- ▶ Independently develop and own complex, responsive front-end applications using Angular, TypeScript, HTML5, and CSS3.
- ▶ Build and maintain reusable Angular components, services, modules, and implement efficient state management.
- ▶ Design, optimize, and manage database schemas, complex queries, stored procedures, and functions in SQL Server and PostgreSQL.
- ▶ Take ownership of modules end-to-end and actively support junior developers within the team.
- ▶ Independently handle debugging, performance tuning, and root cause analysis of application issues.
- ▶ Conduct code reviews, enforce coding standards, and contribute to best practices across the team.
- ▶ Manage source code, branching strategies, and pull requests using Git / GitHub.
- ▶ Actively participate and contribute to application deployments, releases, and maintenance activities.
- ▶ Create technical documentation, design specifications, and implementation guides.

## REQUIRED QUALIFICATIONS & EXPERIENCE

- ▶ Bachelor's degree in computer science, IT, Engineering, or related field.
- ▶ 3–4 years of professional software development experience.
- ▶ Strong proficiency in ASP.NET and ASP.NET Core with C#.
- ▶ Solid expertise in Angular — components, services, routing, and state management.
- ▶ Deep knowledge of SQL Server and PostgreSQL — schema design, complex queries, and query optimization.
- ▶ Strong experience with RESTful API development and Entity Framework Core.
- ▶ Solid understanding of Git — branching strategies, pull requests, and code reviews.
- ▶ Knowledge of authentication and authorization — JWT, OAuth, role-based access.
- ▶ Familiarity with Microservices or service-oriented architecture.
- ▶ Experience working in Agile/Scrum teams.
- ▶ Strong problem-solving, analytical, and communication skills.

## PREFERRED SKILLS (NICE TO HAVE)

- ▶ Docker and containerization experience.
- ▶ CI/CD pipeline setup and management.
- ▶ Unit testing and automated testing frameworks.
- ▶ Familiarity with cloud platforms such as AWS or Azure.

## WHAT WE OFFER

- ◆ Competitive CTC (market-aligned)
- ◆ Health & Wellness benefits
- ◆ Flexible / hybrid work options
- ◆ International exposure (India · UAE · Singapore)

- ◆ Fast-growth startup culture with ownership mindset
- ◆ Learning, certifications & conference budget
- ◆ Work directly on enterprise-grade SaaS products
- ◆ Collaborative, inclusive & innovation-first team

## HOW TO APPLY

Interested candidates are invited to send their updated resume along with a brief cover note to:
